

# Digit Snake

My snake can make a  and my snake can make a .

My snake can curl into a  and think the game is fun.

My snake can curve into a  and bend into a .

Then bend and curve into a  and slither cross the floor

To curl into a perfect , or could that be a  ?

You might look at it up or down – each digit looks divine.

My snake bends into  and twists into , but then

My snake has made the digits, and my snake can't make a 10!

# Plane and Simple

*A plane is flat. Imagine that.  
There's nothing thick about it!  
A table top; a floor to mop;  
A belly-flop! So shout it:  
"A plane is flat and only that,  
No up, no down!" You know it.  
No raiding of the space above  
Nor any space below it.*

# Nine Monsters in a Square

9 monsters in a Square! Wonder how they got in there?

9 monsters in a Square! Come to help them if you dare!

9 monsters! Hear one say, "Won't you help me run away!"

9 monsters! Hear one shout, "Hurry in and get me out!"
